### 2. Reasons for Revisions

On December 3, 2020, the Group revised its consolidated business performance forecasts for the fiscal year ending April 30, 2021, based on the assumption that the impact from the COVID-19 pandemic would continue until the end of the current fiscal year.

However, after reassessing its figures, the Group now expects profits to exceed its previous forecasts due to measures in the mainstay dispensing pharmacy business, including initiatives to improve the efficiency of pharmacy operations that are generating gross profits, and lower-than-expected selling, general and administrative expenses from ongoing operational reforms.

In light of the above, the Group has revised its consolidated business performance forecasts for the fiscal year ending April 30, 2021, released on December 3, 2020.

The revisions have not resulted in any change to the Group's dividend forecast.

Note: The above business performance forecasts have been produced based on information presently available. It is possible that in the future actual results may differ from the anticipated figures for a variety of reasons.
