Summary of our Business Results for the Fiscal Year Ending March 31, 2025

In March, face-to-face sales in the insurance agency business increased by 7% from the previous month and by 13% from the same month last year. Collaborative sales increased by 40% month-on-month and decreased by 25% year-on-year. Non-face-to-face sales decreased by 20% from the previous month and by 43% from the same month last year. Total ANP increased by 10% from the previous month and decreased by 3% from the same month last year.

The number of customers acquired through marketing, a leading indicator, increased by 8% from the previous month. In addition, the cost per acquisition (CPA), which is the cost per customer acquired, was down 5% from the previous month and down 43% from the same month last year, indicating that marketing efficiency continued to improve from the previous month.

In the ASP business, the number of IDs for the application common platform system “DECHI” increased steadily. The number of IDs for “GOYOKIKI”, a customer management system for insurance agents, and “Dynamic OMO”, a video call system specialized for insurance consultation, was affected by an increase or decrease in the number of solicitors and some cancellations at the clients where the system was introduced, but the ASP business remained steady.
